

We want to make things easy for you.

> Norditropin NordiFlex® somatropin (rDNA origin) injection is now on Tier 2 of the Prescription Drug List (PDL) at UnitedHealthcare®

**norditropin
nordiflex®**
somatropin (rDNA origin) injection

At Novo Nordisk, we are helping to make it easy for your patients to take advantage of Norditropin Nordiflex®. We have exclusive or preferred formulary status at most major insurance plans in the United States. In addition, we offer an easy-to-use prefilled disposable pen, fine dosing increments and the comprehensive support of NordiCare®.

- **Easy reimbursement**
Norditropin is in a favorable position at most major insurance plans in the United States.
- **Easy to use**
Norditropin NordiFlex prefilled pens require no loading or mixing and no changing of cartridges. They use NovoFine® 30 and 31 disposable needles* which have ultra-sharp, low angle points.
- **Easy to dose**
Norditropin offers three pen sizes and fine dosing increments:
 - 0.025 - 1.5 mg with the 5 mg pen
 - 0.050 - 3.0 mg with the 10 mg pen
 - 0.075 - 4.5 mg with the 15 mg penIt's easy to dose, just turn the dial to the desired setting.
- **Easy training**
Easy-to-use Norditropin is also easy for the healthcare provider to teach and for the patient and caregiver to use.
- **Easy storage**
After initial use, patients can refrigerate or not - the choice is theirs. Norditropin NordiFlex 5 mg and 10mg pens can either be stored outside of the refrigerator (at up to 77° F) for use within three weeks or in the refrigerator (between 36° F and 46° F) for use within four weeks.**
- **The comprehensive support of Nordicare®**
This support program features reimbursement specialists to handle all of the paperwork required for insurance authorization for each patients or to identify alternate sources to cover treatment costs.

Please enjoy this backpack with our compliments!
